

## Introducing a fantastic machine, the all new Combo\_Coater made in Holland

Pre-duster and breadcrumb applicator  
Flatbed as well as drum breader

The flexibility in coating results that you and your customers have been looking for:

- Pre-dust under an extra wide curtain of flour gives better coverage
- Pre-dust with drum evenly covers thoroughly + spreads products evenly over the beltwidth
- When using breadcrumb you'll soon notice the delicate handling of crumb inside the machine.
- Breadcrumbs are lifted with scoops to eliminate the grinding that traditional screwtype crumb transporters use.
- Optional roller and vibrating plate to attach more crumb to the product

Less different machines in your line reduces -idle time, -cleaning cost, -floor space for unused machines

Sanitary coating machine designed with *clean-ability* in mind.

Optimal hygiene through clever features such as the

- Full and lucious coverage of wet products by extra high capacity curtain ensures there will be no free liquids contaminating the machine.
- Opened drive of the curtainbelt when the hood is open makes cleaning easy
- blower system rounded design and cleanable with high pressure. 
- Encased drive shaft of the drum sweeper arm, no motor right above product area no contamination risk
- Casters integrated in the cabinet

### Beautiful touchscreen features:

The next step in communication with a machine in a natural intuitive way

Spacious color touchscreen controls all 9 frequency drives enabling perfect settings for each product stored in recipes. Software has fault memory, buttons to make each motor run reverse, amperage readout and other troubleshooting tools Icons in 3D pictures on the screen are very clear for any language operator

Safety switch recognition, no more guessing which switch is triggered, touchscreen will tell it

Fast empty mode to change to a different coating material in minutes.  
Easy and quick change-over from drum to flatbed results in wanting to use Combo Coater for more applications  
Reliable level sensor automatically keeps optimal breading level in the machine  
New led technology warning for empty hopper (yellow) or drive fault (red)  
Air knife adjustable in sharpness, height, angle and direction provides perfect blow-off over the width of the belt. Blower is frequency driven.  
Combo Coater is such a nice machine to work with!

### Technical details / dimensions:

Available belt width 400 mm, 600 mm and 1000 mm. Other belt width on request.

Guarantee is 24 months on manufacturing and assembly faults. Wear parts are excluded from guarantee.
